Six Core Values

1. Three Benefits

C.P. Group has always operated our business by adhering to the 'Three-Benefit Principle'. This states that our business should first benefit the countries where we operate; then the communities we engage with and lastly the

company and employees. Since the founding days, this principle has guided our growth and ensured that our operations benefit the society as a whole.

2. Speed with Quality

Modern businesses must be fast-moving, without compromising quality. They must be able to adapt to new circumstances, adopt the latest technologies, respond to both consumers' changing tastes and preferences,

and evolving regulations. As a result, C.P. Group places great importance on the efficiency and effectiveness of our business and employees.

3. Simplification

C.P. Group invests in 21 countries and economies worldwide, operating through more than 200 subsidiaries and employing over 300,000 people. The Group is therefore committed to applying technology and innovation

that simplifies its systems and operations while improving efficiency and effectiveness across the entire Group. Simplification is one of the key practices that has enhanced the Group's success.

4. Accept Changes

Global businesses face daily changing circumstances: from political, socio-economic and environmental issues to consumers' needs and technological development. Our key strategy is to embrace changes. We encourage our employees

to stay informed of new opportunities so that we could deliver more to our customers. This also helps us to manage the evolving circumstances across all of our markets.

5. Innovation

Innovation drives every aspect of our business from processes to products. Businesses must constantly innovate to keep pace with a rapidly changing world. We actively encourage our employees to be innovative.

Our goal is to foster innovation across our business to deliver the best products and services to our customers.

6. Integrity

Since the very first day of C.P. Group, we have operated our business with integrity and transparency in every transaction—big or small. We firmly believe that any business focusing solely on self-enrichment and

disregarding integrity will ultimately lose trust of its stakeholders and ability to operate in the long run.

Corporate Governance Principles

1. Our strength lies in our ability to constantly evolve and adapt our businesses.

The Group's focus on entrepreneurship allows us to recognize new opportunities, and to adapt our businesses to remain competitive in evolving markets.

2. Our network of businesses creates synergies, which we maintain responsibly and in full compliance with all regulations.

Our many interconnected businesses enable us to deliver higher quality and better service to our customers. Our Corporate Governance Principles ensure that we pursue any synergy in full compliance with all relevant laws and regulations.

3. We strive to ensure our entrepreneurial spirit is always balanced by responsible risk management.

Our entrepreneurial mindset has enabled us to grow into the multinational business that we are today. However, our risk strategy ensures that our entrepreneurship flourishes strictly in line with the long-term interests of the Group and its stakeholders.

4. Our Boards provide leadership, set strategic objectives, and make decisions to build real value for the Group and all its stakeholders.

Each board provides clear directions and defines sustainable processes to ensure we continue to grow as a robust and forward-looking business. Management is then empowered to implement this direction and measure success.

5. Our Directors provide informed opinions and advice on governance to guide the Board. To execute their duties, they must be independent and steadfast.

Each of our Directors deliver a unique contribution to the Board on which they serve. We expect all of our Directors to carry out their duties with independence and resolve.

6. Up-to-date information and research is vital for our Boards to make sound business decisions.

All C.P. Group Boards and Directors must actively educate themselves on all aspects of the company, its industries and all relevant external developments so that they have the information they need to perform their duties.

7. We compose our Boards carefully to ensure that they have the knowledge and experience to make informed decisions.

We strive to ensure that the composition of our Boards is well-balanced. We identify a suitable size and structure for each business and we seek to fill those positions with Directors who have diverse experience and skills.

9. We are committed to open, effective and ongoing communications with all of our stakeholders.

Good corporate governance goes beyond regulatory compliance. It requires respectful management of the relationships between the Group and its stakeholders. Whenever appropriate, we engage in robust dialogue with these groups. Assessing our effectiveness in maintaining this dialogue is a key element in the way we measure our success.

8. We take a rigorous and transparent approach to evaluating and incentivizing performance at all levels.

It is the responsibility of the Board to set, oversee and, for listed companies, disclose the remuneration framework. The Board must establish and enforce clear guidelines on Director and Management compensation, as well as benchmarks and performance assessments on individuals, committees and the Board as a whole. Listed companies are also advised to appoint external consultants to ensure transparency.

10. We are committed to the rights of minority shareholders.

All our shareholders have the right to timely information about our business performance and the right to communicate with management. As a result, each Board must disclose clear and comprehensive financial reports and ensure that effective controls are in place to safeguard transparency and integrity in our reporting.

11. Integrity and honesty lie at the heart of who we are.

We expect our Boards, management and staff to maintain high ethical standards at all times. We require them to treat our suppliers, our customers and the environment with respect and dignity, and to perform the necessary due diligence to ensure that our partners do the same.
